

Product Specifications

Holsters

eV2™ Infidel

The eV2™ Infidel Holster is a hybrid, appendix inside-the-waistband (AIWB) holster designed to be so comfortable you forget you are wearing it. This hybrid holster is a combination of a leather backing that sits against the skin, with a Kydex® shell that holds the gun in the front. The Kydex® shell minimizes the collapse of the holster after draw, improving the ease of reholster when compared to all leather IWB holsters. The two-ply leather backing was specifically designed to maximize the comfort of the holster by placing smooth leather against your skin, rather than hard plastic or metal hardware. The polymer Infidel Clip is easy to attach and detach, and can be adjusted to allow the user to cant the holster 15 degrees forward, straight up and down or 15 degrees backward.

- Kydex® shell enables easy reholster
- Features two-ply leather backing for superior comfort
- Interchangeable Kydex® shells allow for carry of multiple guns with one holster
- Easy-on, easy-off Infidel Clip
- Infidel Clip includes slot to easily fit over belt loop for added position security
- Retention screws allow for perfect holster retention adjustment
- Comp-Tac Kick can be added separately- suggested to use Kick only with straight up and down cant
- Both right and left hand options available
